

## GENTLE:MOTE

Pan/Tilt Remote Head for Broadcast Cameras  
Intuitive, accurate and gentle operation

In cooperation with Georg Thoma a new generation of lightweight robotic remote heads come to life, designed without compromise to handle HD broadcast cameras. The GENTLE:MOTE can accommodate cameras weighing up to 20kg in continuous and extremely quiet pan and tilt movements.

Its gearboxes fulfil IP65 standard, have surprising power, impressive response and therefore giving it a superb level of performance. The MELLOW:HEAD gives the operator a real satisfaction when it comes to producing unbelievable shots.

### Features

- Gentle and accurate operation
- Extremely quiet movements
- Adjustable limits
- Compact design
- Small deadweight
- High payload
- Store- and recallable positions
- Movement presets
- Adjustable speed ramps
- Mitchell mount
- Powered by Thoma
- Made in Germany

The motion control feature option opens a wide range of other special applications. The system offers the availability to store and recall position and movement presets pretty easy and comfortable. Due to its serial data interface the system is extremely easy to integrate into existing broadcast infrastructure. In addition, the TV Skyline control panels provide comfortable working.

#### TECHNICAL DATA

Pan range	360°
Tilt range:	300°
Data interface:	RS422/RS485
Data input:	8-pin Binder
Input voltage:	12V/DC
Zoom, Focus output:	12-pin Binder
Power consumption:	Max. 144W
Mount:	4x M8, Mitchell
Protection class:	IP65
Payload:	Max. 20kg

Weight:	~10kg
Dimensions (w x h x d):	421 x 413 x 150mm
Options:	- Motion control - Extender
